INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/DE2003/004171

I. Basis	of the re	port					
1. With	regard to	the elements of the international application:*					
\boxtimes	the inte	mational application as originally filed					
	the desc	cription:					
	pages	1-13	, as originally filed				
l	pages		, filed with the demand				
ł	pages	, filed with the letter of					
M	the clai	ms.					
لحقا	pages	1_13	, as originally filed				
1	pages	, as amended (together with any state					
<u>l</u>	pages		, filed with the demand				
1	pages	, filed with the letter of					
\boxtimes	the drav						
	pages	_	as originally filed				
ļ	pages		, filed with the demand				
1	pages	, filed with the letter of					
	-	ence listing part of the description:					
1	pages						
İ	pages		, filed with the demand				
}	pages	, filed with the letter of					
the i	2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item. These elements were available or furnished to this Authority in the following language which is:						
	the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).						
	the language of publication of the international application (under Rule 48.3(b)).						
	the language of the translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).						
3. Wit	3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:						
	contained in the international application in written form.						
	filed together with the international application in computer readable form.						
	furnished subsequently to this Authority in written form.						
	furnished subsequently to this Authority in computer readable form. The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.						
	The s	tatement that the information recorded in computer readable form is identical to the writt furnished.	en sequence listing has				
4.	The ar	mendments have resulted in the cancellation of:					
1	닏	the description, pages					
		the claims, Nos.					
1		the drawings, sheets/fig					
5.		eport has been established as if (some of) the amendments had not been made, since they have it the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**	ve been considered to go				
in t		sheets which have been furnished to the receiving Office in response to an invitation under Art as "originally filed" and are not annexed to this report since they do not contain a					
	•	nent sheet containing such amendments must be referred to under item 1 and annexed to this re	eport.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/DE 03/04171

V.	Reasoned statement under Article 3 citations and explanations supporting	5(2) with regard to novelty ng such statement	, inventive step or industrial app	licability;
1.	Statement			
	Novelty (N)	Claims	1-13	YES
		Claims		NO
	Inventive step (IS)	Claims	1-13	YES
		Claims		NO
٠	Industrial applicability (IA)	Claims	1-13	YES
		Claims		NO.

2. Citations and explanations

The present report mentions the following search report citation (D1):

D1: EP-A-1 126 685 (SIEMENS INF & COMM NETWORKS) 22 August 2001 (2001-08-22)

1. Document D1 is considered the prior art closest to the subject matter of claim 1.

Document D1 describes a problem similar to the one indicated in the application, i.e. the TSP (telephony service provider) database is updated only when the TSP is initialized and those terminals for which there are not yet any entries in the database cannot be accessed by means of the TSP. Furthermore, a running system cannot be updated by restarting the TSP because a number of TAPI lines are always engaged (paragraph [0005]).

The solution disclosed by document D1 is based on a method according to which, at the request of an administrator, a determination is made for all affected PBXs whether new TAPI-capable terminals have been added or if any have been deleted, and corresponding database deltas are created for the TSP (abstract).

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/DE 03/04171

Claims 1 (method) and 9 (device) specify an alternative solution to the problem of interest wherein TAPI lines are dynamically added to and then removed from the TSP database as required and as a function of monitoring of the terminals.

This substantive matter is not suggested by document D1, and an inventive step is therefore acknowledged for independent claims 1 and 9 (PCT Article 33(3)).

2. Claims 2-8 and 10-13 are dependent upon claims 1 and 9 and thus likewise satisfy the requirements of PCT Article 33(2) and (3).
